DECLARATION BY THE CANDIDATE

I, the undersigned, solemnly declare that the independent project report entitled “**Library Management System**” is based on my own work carried out during my study under the supervision of *Siddharth Meshram*.

I assert that the statements made and conclusions drawn are an outcome of the project work. I further declare that to the best of my knowledge and belief that the report does not contain any part of any work which has been submitted for the award of any other degree/diploma/certificate in this University/Deemed university of India or any other country.

(Signature of the Supervisor)

Name: Anil Nai
Roll No.: 300012824009
En. No. – CE3692
Semester : 3rd

CERTIFICATE BY THE SUPERVISOR

This is to certify that the independent project report entitled “**Library Management System**” is a record of project work carried out under my guidance and supervision for the fulfillment of the award of degree of Bachelor of Engineering in the faculty of Computer Science & Engineering of Chhattisgarh Swami Vivekananda Technical University, Bhilai (C.G.) India.

To the best of my knowledge and belief the report

- i) Embodies the work of the candidate himself
- ii) Has duly been completed
- iii) Fulfills the partial requirement of the ordinance relating to the B.Tech. degree of the University
- iv) Is up to the desired standard both in respect of contents and language for being referred to the examiners.

ACKNOWLEDGEMENT

Working for this project has been a great experience for me. There were moments of anxiety, when I could not solve a problem for the several days. But I have enjoyed every bit of process and am thankful to all people associated with me during this period. I convey my sincere thanks to my project guide **Siddharth Meshram** for providing me all sorts of facilities. His support and guidance helped me to carry out the project. I owe a great debt of his gratitude for his constant advice, support, cooperation & encouragement throughout the project. I also pay special thanks for his helpful solution and comments enriched by his experience, which improved my ideas for betterment of the project. I would also like to express my deep gratitude to respected **Director Sir** and college management for providing an educational ambience. It will be my pleasure to acknowledge, utmost cooperation and valuable suggestions from time to time given by the staff members of the department, to whom I owe my entire computer knowledge and also I would like to thank all those persons who have directly or indirectly helped me by providing books and computer peripherals and other necessary amenities which helped me in the development of this project which would otherwise have not been possible.

ABSTRACT

The Library Management System is a Python-based application developed to automate and simplify the basic operations of a library. Traditional library systems rely heavily on manual record keeping, which is time-consuming, inefficient, and prone to errors. This project aims to overcome these issues by providing a computerized solution for managing book records in an organized and reliable manner.

The system is designed using object-oriented programming concepts and file handling techniques. It allows users to add, display, search, issue, return, and delete book records through a menu-driven interface. Book data is stored persistently using Python's pickle module, which enables efficient data storage and retrieval without the need for an external database.

The project focuses on simplicity and ease of use, making it suitable for small libraries and academic purposes. Although the system has certain limitations such as lack of a graphical user interface and advanced security features, it successfully demonstrates the practical application of Python programming concepts. The Library Management System serves as a strong foundation for future enhancements such as database integration, GUI development, and multi-user support.
